Stephen A. Gillett - Asst. Superintendent

### MEMORANDUM

To: Boards of Health of Member Towns  
From: Anthony Texeira, Superintendent  
Plymouth County Mosquito Control Project  
Date: February 12, 2016  
Subject: Public Notice of Proposed Aerial Pesticide Applications during the 2016 Season

The following is offered as an explanation/clarification of the enclosed published notice:

- 1) We are, and always have been, required by 333 CMR 13.05 to publish notice of our intent on this subject in a newspaper of general circulation prior to application.
- 2) Recent changes in the Regulations have enabled us to streamline this process by publishing notice a single time, in February, for the entire season. This change also requires us to forward this notice to the effected towns within seven (7) days of publication, which we were not previously required to do.
- 3) The notice is intended to convey that we **MAY** DO AERIAL LARVICIDING, **IF APPROPRIATE**, subject to severity of larval populations and acceptable flying conditions. It does **NOT** mandate us to make applications.
- 4) If we feel, as the season progresses, that aerial applications should be made in your town, we will re-notify you as soon as possible in advance, stating the date, time and location.
- 5) As always, if you have any questions, please feel free to contact us.

Cc: Dept. Food & Agriculture (Pesticide Bureau)  
State Reclamation Board

## Legals

### NOTICE OF AERIAL APPLICATION OF PESTICIDES

By the Plymouth County Mosquito Control Project during 2016 between the hours of 4:00 a.m. to 9:00 p.m. as conditions permit. Applications will be made in the town(s) of Abington, Bridgewater, Brockton, Carver, Cohasset, Duxbury, East Bridgewater, Hattifax, Hanover, Hanson, Hingham, Hull, Kingston, Lakeville, Marion, Marshfield, Mattapoisett, Middleboro, Norwell, Pembroke, Plymouth, Plympton, Rochester, Rockland, Scituate, Wareham, West Bridgewater and Whitman in order to reduce the number of mosquito larvae. The insecticides to be used will be one or more of the following:  
 VectoBac®12AS (Bti),  
 VectoBac®GS (Bti),  
 VectoBac®WDG (Bti),  
 VectoBac®WDG (Bspn/Bti),  
 or Vecto Max CG.  
 Only mosquito breeding sites will be treated and no spraying will be done over residences. For further information contact Anthony Teixeira at 781-585-5450.
